Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Mitchell Tower

The University of Chicago

Offers instruction during the Summer Quarter on the same basis as during the other quarters of the academic year.
The undergraduate colleges, the graduate schools, and the professional schools provide courses in **Arts, Literature, Science, Commerce and Administration, Law, Medicine, Education, and Divinity.** Instruction is given by regular members of the University staff which is augmented in the summer by appointment of professors and instructors from other institutions. For **Mathematics** courses see News Column.

Summer Quarter, 1919

1st Term June 16--July 23 2d Term July 24--Aug. 29

Detailed announcements will be sent upon application

THE UNIVERSITY OF CHICAGO Chicago, Ill.

University of Wisconsin

Summer Session, 1919

June 30 to August 8 (Law School, June 23 to August 29)

320 Courses. 160 Instructors. Graduate and undergraduate work leading to the bachelor's and higher degrees. Letters and Science, Medicine, Engineering, Law, and Agriculture (including Home Economics).

Teachers' Courses in high-school subjects. Strong programs in all academic departments. Exceptional research facilities. Favorable Climate. Lakeside Advantages.

Mathematics: See list of courses in News Column of this issue.

One fee for all courses, $15, except Law (10 weeks) $25.

For further announcements address

Registrar, University, Madison, Wisconsin

The Summer Session of Cornell University

Opens July 5, 1919 Closes August 15, 1919

The Department of Mathematics offers Courses in the following Subjects

Solid Geometry, Advanced Algebra, Trigonometry, Analytic Geometry and Differential and Integral Calculus, Advanced Calculus, Differential Equations, Advanced Geometry, Analysis.

Members of the Department of Mathematics also offer to direct reading or research along various lines whether or not closely related to courses given. For further information address

DEPARTMENT OF MATHEMATICS
CORNELL UNIVERSITY ITHACA, NEW YORK

UNIVERSITY OF COLORADO

Sixteenth Summer Session June 30 to August 9, 1919

Graduate and undergraduate courses in Arts, Engineering, Law and Medicine (Boulder and Denver). Daily open lectures of general interest and educational value.
Laboratory of Mountain Field Biology at Tolland, on the Moffat Road.
Courses for teachers, principals, and superintendents in many departments. Many courses counting toward professional requirements of Colorado Certification Law.
In the foothills of the Rockies; ideal location for summer study and recreation; weekly conducted excursions to points of interest. Boulder is the south gateway to Rocky Mountain National Park.
For Bulletin and further information, address the Registrar,

The New

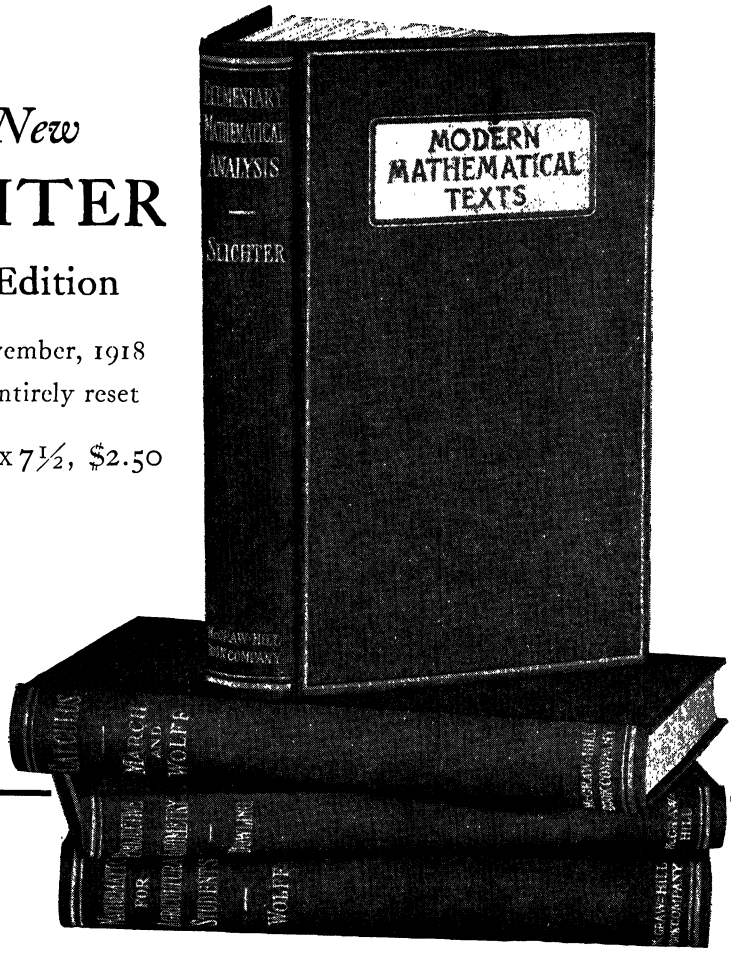
SLICHTER

Second Edition

Published November, 1918

Revised and entirely reset

497 pages, 5 x 7½, $2.50



New Second Edition of

Elementary Mathematical Analysis

By CHARLES S. SLICHTER, Sc.D.

Professor of Applied Mathematics, University of Wisconsin

A text book for first-year college students which treats the various topics in freshman mathematics as belonging to a single science. The *new* Slichter combines in a single book work in trigonometry, college algebra, and analytic geometry. In this revision, simplification of the material has been the main end in view. The emphasis is on the notion of functionality.

TAYLOR AND ALLEN'S

Junior High School Mathematics

FIRST COURSE

By E. H. TAYLOR and FISKE ALLEN

of the Eastern Illinois State Normal School

210 pp. 12mo. 80 cents.

This is the first of a series of two books in mathematics for the seventh and eighth grades. These books assume that the pupil has mastered the work in arithmetic usually given in the first six grades. They continue the work in arithmetic by drill to obtain speed and accuracy, a study of percentage and its applications in ordinary business and in other everyday affairs, and a study of mensuration. They extend the mathematical content of the course of the seventh and eighth grades by including those parts of elementary algebra and geometry that are adapted to the abilities of the pupils of these grades. This extension is made possible by the omission of the more difficult and technical applications of arithmetic found in the traditional course.

This book for the seventh grade contains (1) much drill in the fundamental operations of arithmetic; (2) practice in the interpretation of problems; (3) exercises in the use of the literal notation in interpreting and evaluation formulas; (4) a study of percentage and its applications to common life as well as to business problems; the study of a considerable number of geometric notions, theorems, and constructions without demonstration.

The American Mathematical Monthly

OFFICIAL ORGAN OF

The Mathematical Association of America

Is the Only Journal of Collegiate Grade in The Mathematical Field in this Country

This means that its mathematical contributions can be read and understood by those who have not specialized in mathematics beyond the Calculus.

The Historical Papers, which are numerous and of high grade, are based upon original research.

The Questions and Discussions, which are timely and interesting, cover a wide variety of topics.

Surveys of the contents of recent books and periodicals constitute a valuable guide to current mathematical literature.

The Topics in the department of Undergraduate Mathematical Clubs have excited wide interest both in this country and in Great Britain.

The Notes and News cover a wide range of interest and information both in this country and in foreign countries.

The Problems and Solutions hold the attention and activity of a large number of persons who are lovers of mathematics for its own sake.

There are other journals suited to the Secondary field, and there are still others of technical scientific character in the University field: but the MONTHLY is the only journal of Collegiate grade in America suited to the needs of the non-specialist in mathematics.

THE MATHEMATICAL ASSOCIATION OF AMERICA now has over eleven hundred individual and institutional members. There are already nine sections formed, representing twelve different states. The Association has held so far two national meetings per year, one in September and one in December. The sections, for the most part, hold two meetings each year. All meetings, both national and sectional, are reported in the Official Journal, and many of the papers presented at these meetings are published in full.

The slogan of the Association is to include in its membership every teacher of collegiate mathematics in America and to make such membership worth while. Application blanks for membership may be obtained from the Secretary, W. D. Cairns, 27 King Street, Oberlin, Ohio.

THE NEW ERA PRINTING COMPANY

LANCASTER, PA.

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

Books, Periodicals

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

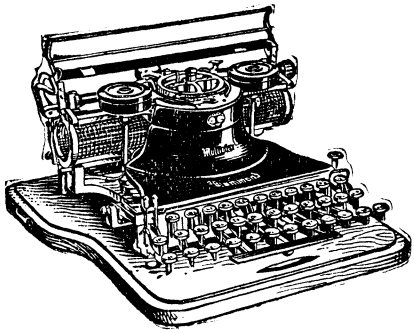
All Kinds of Commercial Work

(*Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.*)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

THE NEW ERA PRINTING COMPANY

Mathematical Special—Premier of the Profession



No Other Typewriter Can Do This

Enables the *amateur* to write as neat appearing letters *from the very beginning* as the experienced operator.

The "Mathematical Special" model of the MULTIPLEX HAMMOND carries 120 distinct characters; about 30 additional ones can be made with simple combinations. "No other typewriter can do this." It has no equal in the mathamatical profession.

Aside from these remarkable features, every

MULTIPLEX HAMMOND

"WRITING MACHINE"

carries two different styles of type, or two languages, in the one machine. "*Just Turn the Knob*" and change. There are more than fifty different languages in many sizes and styles which can be substituted in a few seconds.

The first paragraph, and the one following, show a few of the 365 different arrangements of types and languages (slightly reduced) *instantly changeable on the Multiplex Hammond:*

A Revelation in Typewriterdom

The Multiplex Hammond is unquestionably the most remarble typewriter in existence. Why? *Because of its versatility.*

Think of it—"Just Turn the Knob" and you can change from ordinary Roman to Italics —INSTANTLY—or from large Gothic to Miniature—INSTANTLY—or from English to Russian—INSTANTLY!

Note the 10 styles of type opposite, all written on the same machine.

petite - for extra condensing
Miniature - for refined letters
Small Roman-neat business
Script - private correspondence
Medium Roman-general letters
Italic - emphasizing
SPECIAL GOTHIC - CLEAN CUT
Large Gothic - sermons, lectures
Large Roman - sermons, lectures
Clarendon - new, attractive

Writes Anything, Anywhere, Any Way!

Business executives, sales managers, doctors, lawyers, advertising men, writers, druggists, linguists, students —men, women and children in all walks of life—find they can do clearer, cleaner, better work on the Multiplex Hammond. Tell us what your business or vocation is and our Service Department will give you *free*, full details of the particular Multiplex Hammond that is best adapted to your needs.

Our **new mathematics folder** will be sent to you, free. Write for it *now*—sign and mail the Coupon below, and mail to—
